Technical Skills

Html , CSS , Js - Web-development

Education

KIET | B.Tech in CS and Cybersecurity

2021-2025

Projects

KIET Student App [Figma](#)

- **Student app:** Designed a unified mobile experience integrating updates, study materials, attendance, library access, and profiles—adopted by **1K+ DAU and 5K+ MAU**.
- Built a custom design system aligned with the college’s branding, ensuring visual consistency across **40+ screens** with Lo-Fi and Hi-Fi Figma prototypes.
- Designed a companion **admin dashboard** to manage timetables, announcements, and leave approvals—streamlining staff-student communication.

Expenso [case study](#)

- Designed a mobile app to help users track daily expenses with a clean, user-first interface, focusing on clarity and ease of use.
- Used a **monochromatic dark grey** theme to craft a modern, minimal experience—enhancing focus and reducing cognitive load.
- Built a reusable design system to ensure consistency in **typography, spacing, and color** usage across the app, improving scalability and visual harmony.

Boat Travels [Figma](#)

- Revamped the web app with a consistent theme and **visual storytelling** to boost engagement and showcase trip highlights.
- Simplified the booking flow and added **real reviews** to build trust and drive conversions.
- Designed **intuitive layouts** with clear sections for services, staff, and entertainment to enhance **user clarity** and decision-making.
