

I solved real-world problems with good visuals and exceptional UX. A problem solver through design, I have experience crafting social media engagement designs for a company. I also worked as a product designer, solving TAs' hiring challenges and designing a chat interface with a unique user experience and also closely worked with data science team.

Experience

Geekbull Consulting – Onsite (Hyderabad)

Nov 2024 – April 2025

Product Designer (Intern)

Vyaasa – (AI Powered)

Designed HRMS platform to streamline hiring and interview processes for TAs and HRs. Created a dashboard that prioritizes usability, quickly access to contacted Candidates, scheduled interviews and new applications. Improved workflow efficiency by simplifying interview scheduling, document management, and hiring details. Built a own design system, maintaining consistency with the color theme and typography.

Chatbot Interface – (Generative System)

Designed a generative system with a structured table of contents for easy navigation. Maintained visual consistency throughout the project to align with requirements. Implemented unique features for each card to effectively display queries and interactive elements to enhance user engagement.

Adm Educational Welfare Society – Remote

May 2024 – July2025

UIUX Designer (Intern)

Designed visually appealing posters for social media to the organization s online presence and increase engagement, Contributed to Medical Mobile Application.

Projects – KIET Student Mobile Application

Jan 2024 – April 2024

I solved many students' problems with a single mobile application by providing all their daily needs in one place. Designed a mobile app for my college that includes daily updates, study materials, attendance tracking, library access, and student profile management. I maintained consistent colors and typography, with aligning college theme, followed design principles, created a design system, and developed both Lo-Fi and Hi-Fi prototypes.

It received positive feedback, **with 1K daily active users (DAU) and 5K monthly active users (MAU)**

Admin – Designed admin application to post notifications, updates, timetables and to approve leaves.

Expense Manager – Expenso

Feb 2025 – March 2025

Designed a mobile application to help users to track daily expenses with a simple and clean interface.

Used a monochromatic dark grey theme to create a minimal, focused experience. Focused on user-friendly navigation and clear data presentation to improve usability. Developed a design system for consistency, typography, and minimal color usage for modern design.

Boat Travels booking webPage

Mar 2025 – Apr 2025

Redesigned the Boat Travels web application with a consistent theme to improve bookings and attract more customers. Explained the trip experience visually through categorized sections like services, staff behavior, and entertainment. Personally made UX decisions to guide users smoothly through the booking process. Added customer reviews to build trust.
